

REVIEW OF POST 14 EDUCATION OVERSEAS

A review of 14-19 education overseas is currently underway which will consider how (if at all) the full entitlement to all the post 14 educational options can be provided for dependants living overseas. The entitlement from 2013 includes traditional GCSE and A'levels, the new Diplomas and work based apprenticeships. Alongside this the law changes to raise the school leaving age to 17 and then 2 years later in 2015 it raises again to 18.

All this provides a real challenge for the MoD to provide for the small numbers of 14-19 year olds who accompany their parents to Germany and Cyprus. The review will consider all the options and recommend the best way forward.

If you would like your voice heard as part of the review please complete the online survey at <http://www.sceschools.com/jap/> . Closing date 7 December 2009.
