

Potential Disruption to Health Services

Please note that due to essential work in preparation for the forthcoming deployment the medical centres across Paderborn Garrison will be extremely busy for the first weeks of September; delivering essential care to those about to deploy.

As such, non-deploying users of these centres may find a slight disruption to routine services during this time. Please be assured that **medical emergencies will continue to be seen as a priority.**

The medical service providers ask for your patience and understanding whilst they deliver this essential care to the deploying soldiers. If you have any queries regarding this advice please speak to your local medical centre reception staff in the first instance.
